10 kg	6mm & 3mm pellets

## Medikoi

### Medikoi Growth

Grow your Koi rapidly and safely.

Medikoi Growth has been scientifically formulated to provide the optimum level of healthy but rapid growth and low waste.

The high protein level of 40% is partnered with a relatively higher oil content of 7.3%. The oil provides the energy source so that the maximum amount of protein can be used for growth but not too high so there is no oily slick.

This highly digestible formulation ensures that there is much less waste as more of the food is metabolized by you fish.

For best results feed Medikoi Growth in the warmer months when temperatures exceed 12 C.

In conjunction with the Medikoi Health & Beauty programme, Medikoi Growth can either be used as a substitute for Beauty or as a second feed whilst feeding Medikoi Health.
