

armchair. A small footrest matches perfectly for relaxing with the reclining chair.

Stainless Steel, Grade 304, with a large percentage of chrome and nickel provides an optimal and extremely durable stainless steel for outdoor furniture. It is used for many industrial and civil engineering projects, on account of its' strength and corrosion resistance.

Genuine plantation Teak (*Tectona grandis*) is the premier timber for outdoor furniture. Teak combines its' lovely appearance with a strength and durability that is unequalled by any other timber. The mix of stainless steel with teak, combines one of the best man made materials, with a beautiful and natural wood to produce very fine furniture.

The material used for the seating is a durable and breathable synthetic mesh fabric, which is pleasant to touch and extremely comfortable. The fabric has been especially developed for outdoor use and has been tested between -30c and +70c. It is completely weather resistant and has a high U.V. light stability.

About Aluminium

The aluminium range of furniture featured in this catalogue is designed and manufactured by a prestigious German company, Sieger, who have been established as a leading European supplier for over 70 years. Sieger products are designed and made to a high standard with precision and quality that German companies are famous for throughout the world.

The sturdy frames of the furniture are constructed with a good quality aluminium, and painted with a smooth and attractive champagne finish. Aluminium is a light, strong and durable material and has excellent properties for the manufacture of outdoor furniture.

Both sizes of dining table feature Sieger's patented weather resistant Meacalit tops. The high density board is laminated on the top and bottom surfaces with a multilayered melamine coating which is heat and scratch resistant. The edges are completely sealed by a polypropylene moulding, to make the top completely weatherproof. The tables can be folded away in seconds for easy storage when required.

The reclining chair is an excellent dining chair and being adjustable as well is ideal for relaxing, especially with the matching footrest which can also act as a small side table. Versatile stacking armchairs provide a convenient alternative when space is tight and can be easily stacked and stored. A very stylish Sun lounger completes the range.

All the seating for this furniture is made from a durable and breathable synthetic mesh fabric which is pleasant to touch and extremely comfortable. The fabric is woven with strong polyester yarns that have been especially developed for outdoor use. The fabric is completely weather resistant and has a high U.V. light stability. It has been tested to withstand temperatures of between -30c and +70c.

About Iroko

Iroko is a high quality hardwood from West Africa, (*Chlorophora excelsa*). Bridgman has selected this timber specifically for its' excellent qualities in being able to withstand the rigours of an outdoor environment, of which very few other timbers are capable.

The Timber Research Association classify Iroko as "very durable", the highest classification for durability. Iroko is naturally resilient to changes in climate, having excellent strength properties, as a result of which it is used extensively in exterior work including marine uses.

The Environment

Bridgman Iroko furniture is produced from kiln-dried timber obtained from West African forests - as part of the effort to encourage these countries and their indigenous people to adopt sensible and realistic regeneration programmes.

Bridgman Umbrellas

Monaco Umbrellas

The Monaco range of domestic umbrellas is available in three sizes all the poles are in two pieces with a brass connector to enable easy storage. Canopies are available in five colours, and are made in a stain resistant and water repellent polyester fabric which is very strong.

Cantilever Umbrella

We offer a heavy duty umbrella in 3.5m round natural and a domestic 3.0m round cantilever

umbrella in natural or green. This style of umbrella is for use at the side of our furniture. Suitable paving slabs for ballast must be purchased separately.

Starlight Umbrella

The Starlight umbrella offers a new concept in outdoor living. Low voltage light strips connected to the umbrella ribs emit a discreet background light and create an intimate atmosphere for dining outside on summer evenings. Available in green or natural, and supplied with a low voltage transformer, 15m cable and 13 amp domestic plug.

Bridgman Cushions

A standard range of cushions are available to fit nearly all our wooden furniture ranges. All 4 Seasons furniture, other than Stackable Armchairs, are supplied with cushions automatically.

Cushions for wooden furniture are available in green, blue, terracotta, ecru (natural) and black.

A Deluxe Cushion to fit all Recliner models is also available.

The fabrics used are U.V. resistant and water repellent, but should not be exposed to rain.

The cushions are foam filled with a Dacron wrapping for extra comfort.

Most of the cushions have removable covers for easy cleaning if required.

Bridgman Aftercare

Wood:

All timbers used in the making of our outdoor ranges are classified as "Very Durable" by the U.K. Timber Research and Development Association; which is the highest classification possible.

Bridgman Wood Treatment & Cleaner, and Bridgman Furniture Covers, will help ensure a long and attractive life for your furniture.

4 Seasons:

The furniture requires no maintenance. Bridgman's Woven & Textilene non foaming cleaner can be used for removing any dirt.

Stainless:

To keep stainless steel in pristine condition, use Bridgman's specially developed Care Kit.

Aluminium:

The furniture is virtually maintenance free, and with reasonable use should give many years of trouble free service. All pieces can be folded or stacked for easy storage and this will extend the life and keep it clean.

Covers:

High quality breathable covers to fit most sets of wooden furniture only.
